

# learning and using mnemonics

#SHINE BRIGHT ♡

**My Very Excellent Mother Just Served Us Nachos** - anyone who recalls this mnemonic for remembering the sequence of stars? Mnemonic techniques can also be applied in adult learning and Neuro Science proves that if we "chunk" information, the brain can retain more knowledge. And knowledge helps us to make smarter decisions. #PinkUniversity just launched an excellent Learning Strategy module, it's worthwhile for your employees to experience it, so that they shine even brighter than they do now. Added bonus: Real star watching tonight in #Sydney #Meteorshower. There will be an unforgettable experience tonight in the Southern Hemisphere as we are expecting one of the best Meteor Shower of the year in the constellation of Gemini- occurring from 10:30PM Sydney Time. Maybe a good time to see if you retained your mnemonics from primary school whilst being mesmerised by an astronomic event.
